How AutoCAD Works With AutoCAD, a user can create, modify, and analyze 2-D and 3-D geometry.

Users can also perform functions such as drawing, editing, annotating, printing, and saving graphics. When a user begins to design, he or she is prompted to create or open a drawing. After that, the user must choose the type of drawing to be created, such as a line, polyline, 2-D block, 2-D surface, polygon, 3-D

---

block, 3-D surface, 3-D solid, or text.

There are several different drawing types, such as:

- 2-D Line: A simple line object that can be stroked, filled, or stroked and filled, and can be annotated.
- 2-D Arc: A simple polyline shape. A polyline can have one or more points that determine how it is rotated.
- 2-D Block: A simple box or rectangle. A block can have two dimensions, four corners, and can be placed on a 2-D surface.

**2-D Line Style:** A simple, one-color line style. The line style can be stroked, filled, or stroked and filled.

**2-D Polyline:** A simple polyline shape. A polyline can have one or more points that determine how it is rotated.

**2-D Circle Style:** A simple, one-color circle style. The circle style can be stroked, filled, or stroked and filled.

**2-D Ellipse Style:** A simple, one-color elliptical circle style. The circle style can be stroked, filled, or

stroked and filled. 2-D Polygon Style: A simple polygon style. A polygon can have one or more vertices that determine how it is rotated. 2-D Rectangle Style: A simple rectangle style. A rectangle can have four corners, a bottom line, a right line, and a top line. 2-D Surface Style: A 2-D surface style can be stroked, filled, or stroked and filled. 2

registration code to them. Alternate Methods for registration: You can also use PTC's web-based registration service. Go to the PTC website at [www.ptc.com](http://www.ptc.com). Select the Registration tab in the left menu, select "Request a Registration Code". Enter the registration code you have generated for your use. Please use the same registration code for your multiple files. For the files that you are registering, make sure you are
